

Microneedling | Aftercare

Micro-needling/ PRP/ iPRF after care

Avoid washing your face for 12 hours following treatment. Showering is recommended bathing is discouraged until the next day.

Minimal makeup and SPF may be applied the following day but **NOT** on the day of treatment.

2-3 days: The skin will appear dry and feel tight frequent use of serums containing peptides and ceramides work well to alleviate this.

After 2-4 days depending on severity of treatment normal skin care regime can be applied. Avoid alcohol based toners for 10-14 days.

Topical omega 3 has an anti-inflammatory effect and can be taken.

Avoid direct sunlight exposure for at least 10 – 28 days if possible. Use a broad brimmed hat or scarf to protect the facial skin.

You may experience temporary swelling, bruising or itchiness around the site of treatment. This will usually settle within a day or two.

Predicted appearance post needling,

Day 1 Redness the skin appears mildly sunburnt. Puffy facial appearance is a possibility around the eyes especially in thin skinned patients. Skin feels tight and dry but there should not be any discomfort.

Day 2 Red persists like moderate sunburn

Day 3 the sun still appears pink.

Day 4- 6 flaking can be prevalent at this stage.

Day 7 In most people, very few signs are visible of the procedure.

If desired but not necessary can also use:

Immediately after micro-needling an anti-histamine

Days 1-5 Oral Omega 3, Vitamins A,C & E Topical Vit C30 serum

Days 5- 28 Oral Omega 3, Glucosamine, amino acids Topical Pro retinol, Vit C30 serum
